KMD-201AA/AWA CRESCENT ICE MAKERS

Double sided evaporator

Product Description

The KMD-201AA (air cooled) and KMD-201AWA (water cooled) are modular ice makers which produce clear, crescent shaped cubes.

- Versatile ice shape used in diverse applications such as splash-free serving of post mix soft drinks, fish transportation, display and even laser therapy.
- Individual premium crescent cube with no ice bridging.
- Exceptionally hard crystal clear cubes that melt slowly.
- CycleSaver® design allows KM machines to produce more ice, using less energy, while cycling 1/2 as many times as the competition.
- Includes a double-sided stainless steel evaporator, which requires fewer cycles to produce a full bin of ice, thereby reducing energy consumption.
- Slide in air filter for easy cleaning - maintaining performance efficiency (air-cooled only).
- Cold and wet areas are insulated and separated from electrical and heat producing components. These design features improve the reliability, sanitation and reduce maintenance and service cost.

Ice Type: Crescent
Size: 30 x 37 x 13 mm
